LISTING OF THE CLAIMS

1. (Currently Amended) An adapter for selectively mounting to an associated wall of a cabinet, comprising:

a first wall having a plurality of generally circular openings configured for receiving associated peg hooks, the openings running generally along a longitudinal axis of said first wall, the first wall including first and second ends that are each generally parallel to the longitudinal axis;

a second wall depending <u>substantially normal</u> from the first end of the first wall; and a third wall extending from the second wall and including an opening <u>including a linear edge</u> for mounting the adapter to the associated wall, wherein the third wall is substantially parallel to the first wall;

a fourth wall depending substantially normal from a second end of the first wall opposite said first end of said first wall substantially parallel to the second wall; and

a fifth wall extending from the fourth wall, wherein the fifth wall is substantially parallel to the first wall, wherein the fifth wall comprises a notch for mounting the adapter to the associated wall, wherein a longitudinal axis of the notch is aligned with a longitudinal axis of the opening in the third wall;

wherein said adapter is formed of a single piece construction.

- 2-9. (Cancelled)
- 10. (Currently Amended) The adapter of claim 1, further comprising a depression around each of the openings in the first wall, wherein the first wall is depressed towards the associated third wall.
- 11. (Previously Presented) The adapter of claim 1, wherein said openings in said first wall are equally spaced apart, parallel to each other, and equidistant from a top and bottom edge of the first wall.
